

PUBLIC NOTICE

AVAILABILITY OF A FINDING OF NO SIGNIFICANT IMPACT (FONSI) FOR MIDAMERICA ST. LOUIS AIRPORT, MASCOUTAH, ILLINOIS

The Federal Aviation Administration (FAA) announces its approval of a Finding of No Significant Impact (FONSI) on a Condensed Environmental Assessment (EA) prepared by the MidAmerica St. Louis Airport. That finding is for proposed FAA actions to allow the Airport to:

Release approximately 26 acres and transfer ownership of them to a commercial business for development of a commercial building and parking and storage areas.

FAA's FONSI, approved on December 16, 2019, indicates the proposed FAA actions and the local development project are consistent with existing environmental policies and objectives as set forth in the National Environmental Policy Act of 1969 and will not significantly affect the quality of the environment.

The FAA's proposed actions are:

- to issue an environmental finding to allow approval of the Sponsor's Proposed Action / ALP for the land release and development listed above; and
- to issue final airspace determinations for the development listed above.

Copies of the environmental decision (FONSI) and the Condensed Environmental Assessment (the background data on which the decision is based) are available for public information review for the next thirty (30) days after publication of this Notice at the following locations:

MidAmerica St. Louis Airport
9656 Air Terminal Drive, Suite 100
Mascoutah, IL 62258
